Georgia Rental Property Chart of Accounts

General template, not legal advice. Have a Georgia attorney review before use. Last reviewed October 29, 2026.

How to use it: keep the numbering, rename or delete accounts you will never use, and add sub accounts (for example 5020.1 Plumbing) only where you want more detail. Use the same chart for every property and tag each transaction with its property, rather than making a separate set of accounts per building. Your tax preparer may map these accounts to the lines of your return.
